

8th of April 2022

version: 3rd of February 2023

To whom it may concern

Highest Priority

Dear Customer,

due to the current situation with Russia/ Ukraine we have to inform you of the following: as far reaching sanctions have been imposed against Russia and Belarus, there exist delivery restrictions which have to be observed by us as well as by you as our customer. Therefore, we must draw your attention to the following points and the obligation to comply with these requirements:

It is forbidden to export or re- export goods and products (for example in certain cases dual- use-goods) to customers in Russia or Belarus or to areas of the Ukraine which are controlled by pro-Russians and supported by Russia or there is a need to apply for an export permit.

The delivery restrictions apply until further notice.

Because of actual reasons please also note in this context that it is essential that you also check regularly and observe the current sanctions lists of natural or legal persons, entities or bodies, which you can access in various languages on the website <https://eur-lex.europa.eu>. These natural or legal persons, entities or bodies may not be supplied by you and of course you, as a company or a natural person, must not be on these lists either. Additionally we expressly point out that the specifications contained in our General Terms and Conditions (available on www.microdis.net) regarding export restrictions have to be observed by you.

Besides some of our suppliers have informed us that they do not appreciate their products being exported or re- exported to Russia and Belarus and partly to Ukraine. We have to follow this instruction and are also obliged to inform our customers about this fact. This currently affects the following suppliers:

- Epson Timing Devices (including deliveries for the entire territory of Ukraine)
- u-blox AG: sales of unassembled products and u- blox products integrated into others is forbidden to any member of the Eurasian Economic Union (including Russia, Belarus, the Republic of Armenia, the Republic of Kazakhstan and the Kyrgyz Republic), territories occupied by Russia in Ukraine, and Iran. u-blox products may not be used in military equipment, nor in systems which support the identification of targets by military users, or simulation of such weapon systems. It includes military UAVs, military unmanned vehicles and military robots. (3rd of February 2023: restricted territory extended)
- Fischer Elektronik
- Fischer Connectors
- Global Connector Technology

- Wezag

- J.S.T (added on 26th of April 2022)

Please note that the list of suppliers above represents the current state of affairs. The list can be adjusted at any time. Please check on our webpage www.microdis.net regularly for possible changes to the list.

Thank you for your attention and cooperation!
